Kendra Anne Hartnett

Full-Stack Developer | AI Collaborative Software Engineer

Chicago, IL | github.com/kendrahartnett | linkedin.com/in/kendra-hartnett-7877ab422 | kendrahartnett.com

Full-Stack Developer building React and Node.js applications with an emphasis on thoughtful UI/UX, from database architecture to the user interface. Experienced in shipping full-stack projects using Next.js, TypeScript, and PostgreSQL, including community-focused solutions addressing local needs. I approach AI as a collaborator, critically evaluating and testing its output before implementation. Seeking to contribute to a collaborative engineering team while continuing to grow.

JavaScript, TypeScript, React, Next.js, Redux Toolkit, Tailwind CSS, Bootstrap, DaisyUI
Node.js, Express, MongoDB, Mongoose, PostgreSQL, Neon, Prisma, REST, Passport/JWT
Jest, Git, GitHub, GitLab, CI/CD, Vercel, Agile/Scrum
Claude Code, Anthropic API, OpenAI Codex, prompt engineering, Ollama, Hugging Face

The Next Chapter Project* | *AI-Augmented Builder | *Remote* | *Sept 2026 – Present*

- Build and ship full-stack applications using a variety of technologies, frameworks, and development tools through hands-on, collaborative projects.
- Use AI-assisted development to explore solutions and speed up implementation and review AI-generated code for accuracy and quality before it ships.
- Take products from concept through planning, development, testing, and deployment, using Git/GitHub workflows and technical documentation.

Persevere* | *Instructor's Assistant, Full Stack | *Jul 2025 – Jan 2026*

- Developed and implemented 20 full-stack curriculum modules, contributing to a 35% increase in student assessment scores.
- Helped develop the Curriculum Wiki feature, improving access to technical learning resources and supporting student engagement.
- Diagnosed and resolved front-end and back-end bugs across the learning platform, reducing downtime and support ticket volume by 50%.
- Documented technical concepts and facilitated knowledge-sharing between instructors and developers.

Persevere* | *Full Stack Web Developer | *Jul 2024 – Jul 2025*

- Built full-stack web applications using the MERN stack, developing responsive front-end interfaces with React and Tailwind CSS.
- Implemented back-end functionality using Node.js and Express, integrating MongoDB and PostgreSQL databases with secure authentication through Passport and JWT.
- Collaborated with developers to troubleshoot issues, optimize application performance, and refactor code to improve functionality and maintainability.

Full Stack Web Developer Certification | Persevere | Phoenix, AZ | July 2025

The Bridge | AI-Powered Community Coordination Platform
Full-Stack Application | *Next.js, Anthropic API, Neon PostgreSQL*

- Identified a communication gap within the local community and independently developed a platform designed to improve coordination and connection.
- Integrated the Anthropic API to bring AI capabilities into the application, with Neon PostgreSQL supporting data persistence.

EEVORA | AI Solutions & Business Workflow Automation
Independent Product Development | *AI Integration, Workflow Automation*

- Independently developing an AI-focused product platform designed to help small businesses streamline operations through practical technology solutions.
- Explore the intersection of AI, software engineering, and product design to develop practical tools that make everyday business processes more efficient.
